CARE & MAINTENANCE GUIDELINES FOR YOUR LAMINATES

Storage & Carrying

Store the sheets Horizontaly with their face turned down. Place a thick hard board on top of the laminates to protect them from any kind of damage. Stock the laminates in such a way that older sheets will be used first. Store the laminates in a dry place to protect them from moisture. They should also be stored in such a way that they don't come in contact with the floor or walls. Always carry the sheets vertically. Don't slide the sheets, lift them while moving them from once place to another. Ideally 2 people should carry one sheet to avoid carelessness that can damage the surface.

Hot Objects:

Even though the laminates have high heat resistance, exposure to temperatures greater than 135˚C is not recommended. Do not place hot frying pans or dishes directly from the oven or cooktop on the laminate surface. As a precaution, use a trivet or insulated pad to protect the surface from heat generating appliances such as pressing irons, toasters, curling irons and electric cookers. Prolonged exposure to temperatures above 65˚C may result in separation of the laminate from the substrate.

Stains:

The laminates are resistant to stains belonging to Group 1 and 2. Stains of Group 3 and 4 should not be spilled on the surface. In case of spillage, the stains should be immediately wiped off.

Sharp Objects:

Never use knives or other sharp objects directly on the decorative surface. Use a chopping block or counter saver to protect the laminates.

Impact:

The laminates have excellent impact resistance. However, dropping heavy objects or deliberately hammering directly on the surface may cause chipping or cracking.

Abrasives:

Abrasive pads, scouring powders or cleansers can permanently damage the laminates making them more susceptible to staining.

Harsh chemicals:

Harsh chemicals such as oven cleaners, toilet cleaners, or drain cleaners will etch and discolour the decorative surface. The laminates are not designed to resist continual contact with these chemicals. If any of these products spill over the surface remove immediately, rinse thoroughly, and wipe dry.
